UNITED STATES DEPARTMENT OF AGRICULTURE  
AGRICULTURAL ADJUSTMENT ADMINISTRATION

## SOUTHERN DIVISION

PROCEDURE TO BE FOLLOWED BY COUNTY OFFICES IN CHECKING  
COMPLIANCE ON INDIVIDUAL FARMS WITH RESPECT TO THE USE  
OF SOIL-CONSERVING CROPS

(Applicable only to counties listed herein)

In accordance with the provisions of subsection F, Section XI, of Southern Region Bulletin 201 it has been determined that the following counties in the Southern Region are not in substantial compliance in 1938 with reference to the number of cows kept for the production of milk:

## Arkansas:

Benton, Boone, Carroll, Drew, Pope, Washington,  
Yell;

## Louisiana:

Cameron;

## Mississippi:

Forrest;

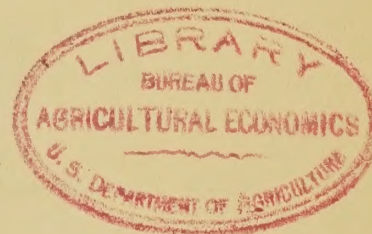

## Oklahoma:

Marshall, Nowata, Sequoyah;

## Texas:

Bastrop, Bowie, Brazoria, Caldwell, Camp, Childress,  
Colorado, Crosby, Dallas, Dawson, Denton, De Witt,  
El Paso, Fayette, Franklin, Gonzales, Grayson,  
Guadalupe, Hale, Hill, Hockley, Hopkins, Hunt, Jim  
Wells, Karnes, Lamb, Lee, Lubbock, Lynn, Morris,  
Nueces, San Patricio, Travis, Washington, Wheeler,  
Wichita, Williamson, Wise.

As a result of this determination it will be necessary for the county agricultural conservation committees of the above counties to check each farm which is to be covered by an application for payment (except those in class B areas having no allotment for any individual crop) to determine that the provision of the regulations relating to the use of soil-conserving crops has not been violated.

A farm will be considered to be in compliance with this provision if the present number of milk cows on the farm does not exceed the normal number on the farm by 3 or more. If the present number of milk cows on the farm exceeds the normal number by 3 or more (as shown by the report of performance), Form ACP-77, "Analysis Sheet - Use of Soil-Conserving Crops for Market", must be prepared.

PURPOSE OF FORM ACP-77

The purpose of Form ACP-77 is to determine eligibility for payment in the event the number of milk cows on a farm in 1938 exceeds the normal number on such farm by 3 or more. (The question of eligibility relates to the individual farm, and a determination that one farm is out of compliance with reference to the use of soil-conserving crops in no way affects a producer's eligibility for payment on any other farm which he owns or operates.)

A farm is eligible for payment insofar as the use of soil-conserving crops is concerned if:

1. There has been no increase in the number of dairy cows kept for the production of milk, or the products thereof, for market; or
2. Less than 10 percent of the milk, or products thereof, produced on the farm is for market; or
3. There is withheld from the production of soil-conserving crops for market an acreage of cropland or restoration land equal to the amount by which the normal acreage of soil-depleting crops exceeds the larger of
  - (a) the total soil-depleting acreage allotment, or
  - (b) the total acreage classified as soil-depleting in 1938.

The first of these conditions is provided for in line 3, Section I; the second in line 4, Section I; and the third in Sections II and III of Form ACP-77.

SECURING DATA FOR FORM ACP-77

The data for lines 1 and 2, column (b), Section I; lines 1, 2, and 3, Section II; and lines 1 and 2, Section III, may be secured from the county office records, and should be filled in for every farm where Form ACP-77 is required.

Line 4, Section II, should then be computed and compared with the entry in line 2, Section III. If the entry in line 4, Section II, does not exceed the entry in line 2, Section III, the farm is eligible for payment insofar as the use of soil-conserving crops is concerned and it is not necessary that the remainder of the form be executed.

If the entry in line 4, Section II, exceeds the entry in line 2, Section III, it will be necessary that a supervisor visit the farm in question and secure the additional data required.

#### PREPARATION OF FORM ACP-77

Form ACP-77 will be prepared in the original only (except as indicated hereafter) in the following manner:

Heading: Enter in the space provided the State and county code and the serial number of the work sheet covering the farm.

Enter in the space provided the name of the 1938 operator.

Enter "1938" in the heading of the form before the words "Agricultural Conservation Program."

Section I: Enter in lines 1 and 2, column (b), the present number of milk cows on the farm and the normal number of milk cows on the farm, respectively, from line 49 of Form SR-212.

Enter in line 1, column (c), the present number of milk cows kept on the farm for the production of milk for home consumption, and in line 2, column (c), the normal number of such cows kept on the farm.

Enter in line 3, columns (b) and (c), the amounts by which the entries in line 1 exceed the entries in line 2 of the respective columns. If the entry in line 3, column (c), equals or exceeds the entry in line 3, column (b), the farm is eligible for payment insofar as the use of soil-conserving crops is concerned and it is not necessary to make any further entry on Form ACP-77.

If the entry in line 3, column (c), is less than the entry in line 3, column (b), enter in line 4 the percentage of the total milk, or products thereof, produced on the farm in 1938 which is for market. This percentage will be determined on the basis of the operator's statement and such investigation as the county committee deems necessary. If this figure is less than 10 percent, the farm is eligible for payment insofar as the use of soil-conserving crops is concerned and it is not necessary to make any further entry on Form ACP-77.

Section II: Enter in line 1 the total soil-depleting base for the farm from Form SR-101.

Enter in line 2 the total 1938 soil-depleting acreage allotment, which will be taken from column 28 of Form SR-204G-A or from column 18 of Form SR-204G-B, whichever is applicable.

Enter in line 3 the total acreage on the farm classified as soil-depleting in 1938 as shown in Section I of the report of performance.

Enter in line 4 the amount by which the entry in line 1 exceeds the larger of the entries in lines 2 and 3.

Section III: Enter in line 1 immediately to the left of column (b) any acreage on the farm designated as restoration land and not devoted to soil-depleting crops in 1938.

Enter in line 2 immediately to the left of column (b) any acreage on the farm designated as restoration land and not devoted to soil-depleting crops or to grasses or legumes in 1938.

Enter in line 1, column (b), the cropland on the farm not classified as soil-depleting in 1938 (from line 12 of form SR-208 or line 10 of Form SR-213) plus any acreage of restoration land entered in line 1 immediately to the left of column (b).

Enter in line 2, column (b), the total nondepleting acreage entered in line 39 of Form SR-212 (excluding any part thereof devoted to grasses or legumes in 1938) plus any acreage of restoration land entered in line 2 immediately to the left of column (b). If the entry in line 2, column (b), equals or exceeds the entry in line 4, Section II, the farm is eligible for payment insofar as the use of soil-conserving crops is concerned and it is not necessary to make any further entry on Form ACP-77.

If the entry in line 2, column (b), is less than the entry in line 4, Section II, enter in line 3(a) in the space provided immediately to the left of column (b) the acreage of nondepleting cropland devoted in 1938 to grasses or legumes not harvested or pastured, and in line 3(b) in the space provided immediately to the left of column (b) the acreage of non-depleting cropland devoted in 1938 to grasses or legumes harvested for seed to be used on the farm.

Enter in line 3, column (b), the total of lines 3(a) and 3(b).

Enter in line 4 the sum of the entries in lines 2 and 3. If the entry in line 4 equals or exceeds the entry in line 4, Section II, the farm is eligible for payment insofar as the use of soil-conserving crops is concerned and it is not necessary to make any further entry on Form ACP-77.

If the entry in line 4 is less than the entry in line 4, Section II, enter in line 5 the acreage of nondepleting cropland devoted in 1938 to grasses or legumes harvested for sale as hay or seed.

Enter in line 6 the sum of the entries in lines 4 and 5.

Enter in line 7 the amount by which the entry in line 1 exceeds the entry in line 6.

Enter in line 8 the product obtained by multiplying the entry in line 7 by the percentage figure derived in line 9, Section IV. (This cannot be done until Section IV has been completed.)

Enter in line 9 the sum of items 4 and 8. (This cannot be done until Section IV has been completed.) If the entry in line 9 equals or exceeds the entry in line 4, Section II, the farm is eligible for payment insofar as the use of soil-conserving crops is concerned. If the entry in line 9 is smaller than the entry in line 4, Section II, the farm is not eligible for any payment under the 1938 Agricultural Conservation Program.

Section IV: Enter in lines 1, 2, 3, 4, 5, and 7, column (b), the respective numbers of all designated forage-consuming animals on the farm.

Enter in column (d) the results obtained by multiplying the entries in column (b) by the respective conversion factors shown in column (c).

Enter in line 6, column (a), the sum of the entries in lines 1 through 5, column (d).

Enter in line 8, column (d), the sum of the entries in lines 6 and 7, column (d).

Enter in line 9, column (d), the percentage figure derived by dividing the entry in line 6, column (d), by the entry in line 8, column (d). This percentage figure will represent the ratio

between the forage-consuming animal units, exclusive of dairy cows kept for the production of milk or the products thereof for market, and the total forage-consuming animal units on the farm.

Section V: Where the information obtainable from the county office records shows the farm to be eligible for payment insofar as the use of soil-conserving crops is concerned, it is not necessary that the operator's signature be secured on Form ACP-77. In such cases, the clerk who enters the data on Form ACP-77 should sign his name in the space provided for the signature of the supervisor.

Where it is necessary to send a supervisor to the farm to secure additional data from the operator, Form ACP-77 should be signed by both the operator and the supervisor.

#### DISPOSITION TO BE MADE OF FORM ACP-77

Where it is determined that a farm is eligible for payment insofar as the use of soil-conserving crops is concerned, Form ACP-77 should be filed in the county office until such time as it may be called for by the State office.

Where it is determined that a sufficient acreage has not been withheld in 1938 from the production of soil-conserving crops for market, no application for payment may be approved for the farm. In this event, the following notation should be clearly written across the face of the application form: NON-COMPLIANCE - SUBSECTION F, SECTION XI, SRB-201. Form ACP-77 should then be securely fastened to the application form and the two submitted to the State office. (In such cases, the original Form ACP-77 should be submitted to the State office and a copy made for the county office files.)

#### DEFINITIONS

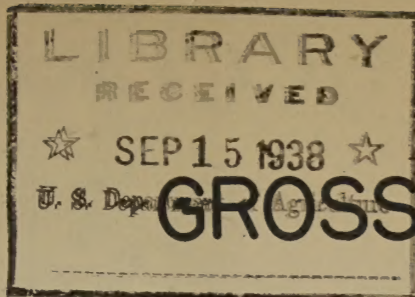

As used herein and on Form ACP-77:

For market means for disposition by sale, barter, or exchange.

For home consumption means for consumption by the farmer's family, employees or household.

Soil-conserving crops means grasses or legumes grown on cropland, except those classified as soil-depleting under Section XIII of Southern Region Bulletin 201.
